MY LIFE THROUGH THE LENS

*A beautifully illustrated journey
across half a century*

featuring ...

1. **Discovering "The Joy ..."** My life began at the age of 13 - when my father gave me his old camera - a 1913 Vest Pocket Kodak. This became my key to adventure. I still have that camera and the first photos I took with it. I had discovered "The joy of photography".
Let me show you —

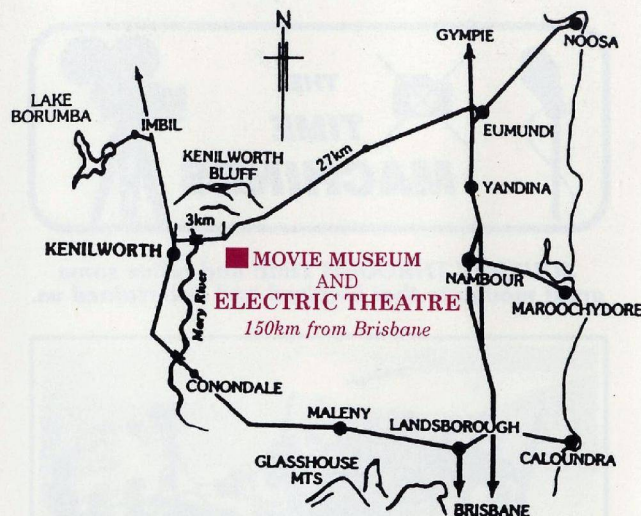

2. **Friends and Heroes:** At the age of 14, I had my first job in the Motion Picture industry - thanks to the Vest Pocket Kodak. I had the privilege of working with some truly wonderful people, people who were famous in their field, and who readily shared their knowledge and experience with me.
Let me show you —

3. **A source of inspiration:** I had the opportunity to see many brilliant Feature Films and Documentaries from all over the world. These provided an exciting source of inspiration.
Let me show you —

4. **The Key to adventure:** Now it was my turn to make TV Drama & Documentary Films—working with Crawford Productions on the pioneering TV series "Homicide". Fancy being paid to travel the country, getting into the most exciting places and situations, and all the time learning new skills in film making—a lifetime of wonder.
Let me show you —

5. **Sharing the joy:** Today, through the Movie Museum and Electric Theatre, I can share the joy with others - and perhaps inspire them to discover the wonder for themselves.
Let me show you —

MOMENTS, MEMORIES AND MAGIC

A CELEBRATION —

"Looking back over half a century of truly wonderful experiences as a Documentary Film-maker and Photojournalist, my greatest joy comes from the brilliantly talented people whose work inspired me throughout my life.

Now, thanks to the wonders of technology, I can share with you a celebration of this amazing talent, in my ultimate presentation —

MOMENTS, MEMORIES AND MAGIC

Using the extensive resources of his **Australian Cinema Heritage Collection**, Kev illustrates the great value of photography and sound motion pictures in our lives. He combines this with an enthusiasm and a philosophy that will make your day!

In **"3M's"** we relive highlights from Kev's most popular shows, **The Magic Chair, My Life through the Lens, and The Time Machines**, together with some brilliant new material. It is wonderfully entertaining, highly informative and truly inspiring - it could change your life.

The Recorders: — your role in the future...

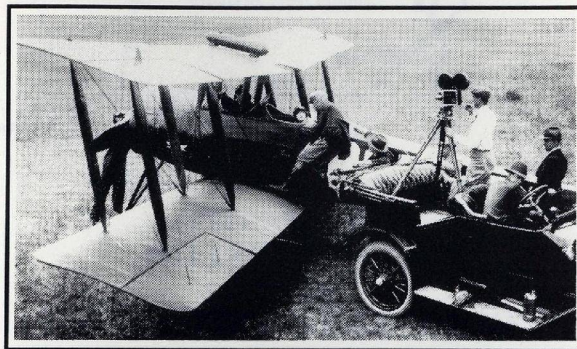

"Every time we take a photo we are **freezing** a moment of history — and images captured by movie and video cameras are the **"Living History"** of the century. These are the vital records of people, places and events that otherwise become just fading memories. So remember — you are writing the next chapter — and taking the pictures too! It's easy — let me show you!"
